

Do you or someone that you know have migraines with menstrual periods?

The Luna study is a research study evaluating the efficacy and safety of an investigational medication compared to placebo for the preventive treatment of Menstrual Migraine.

Investigator Name _____

Phone _____

Study Coordinator _____

Phone _____

Patients must meet the following criteria:

- Are 18 years of age or older and have regular menstrual cycles that are 21 - 35 days in length
- Have a history of migraine for ≥ 1 year
- Have fewer than 15 headache days per month
- Be willing to answer daily questions about headaches, migraine symptoms and menstrual cycles in an electronic diary for the duration of the study

This is not a complete list of requirements; the study doctor will review all of these with you.

All study-related care and assessments will be provided at no cost. Travel compensation may be available.

If you think the Luna study could be for you or someone you care about, please contact the study doctor for further information or visit www.menstrualmigrainestudy.com.
